Section 1 — Market Performance

Query Used: Market-wise Revenue Analysis

Insights:

- APAC is the highest revenue generating market with \$3,581,785 in total sales
- EU ranks second with \$2,937,166 in sales
- Canada is the least performing market with only \$66,932 in sales
- Recommendation: Strengthen presence in Canada and Africa which are significantly underperforming compared to other markets

Section 2 — Monthly Sales Trend

Query Used: Monthly Sales Trend

Insights:

- August and September record the highest sales
- February records the lowest sales of \$543,768
- Sales show a gradual increase from Q1 to Q3
- Recommendation: Plan promotional campaigns during February to boost sales during the slow period

Section 3 — Category Performance

Query Used: Category-wise Average Profit & Highest Discount Category

Insights:

- Technology category had the highest average profit (65.42)
- Furniture category had the highest average discount rate (17%)
- Recommendation: Implementing a maximum discount cap of 10% and shifting to value-based promotions such as free delivery could significantly improve category profitability.

Section 4 — Top Performing Sub-categories

Query Used: Top Performing Sub-categories

Insights:

- Phones is the highest revenue generating sub-category with \$1,706,642 in sales followed by Copiers at \$1,508,370 and Chairs at \$1,500,930
- Copiers leads in profitability with \$258,174 in profit despite being second in sales
- Tables records negative profit of -\$64,113 despite generating \$756,031 in sales indicating heavy losses
- Recommendation: Copiers should be prioritized for growth as it generates the highest profit, while Tables pricing and discount strategy must be urgently reviewed to eliminate losses.

Section 5 — Shipping Mode Analysis

Query Used: Ship Mode Usage Analysis

Insights:

- Standard Class is the most commonly used shipping mode accounting for 60% of all orders (30,764 orders)
- Same Day delivery is the least used shipping mode with only 5.26% of orders (2,699 orders)
- First Class and Second Class together account for 34.74% of total orders
- Recommendation: Since 60% of orders rely on Standard Class shipping, investing in optimizing Standard Class delivery speed and reliability would have the greatest impact on overall customer satisfaction.

Section 6 — Loss Making Orders

Query Used: Orders with Negative Profit

Insights:

- Several orders have negative profit indicating losses
- High discounts are the primary cause of negative profit
- Recommendation: Set a maximum discount threshold to prevent loss making orders

Section 7 — Top Profitable Products

Insights:

- Sauder Classic Bookcase, Traditional is the most profitable product with \$10,672 in profit
- Nokia Smart Phone Full Size and Nokia Smart Phone with Caller ID rank 2nd and 3rd with \$9,938 and \$9,465 in profit respectively
- Technology products (Nokia) dominate the top profitable products list
- Recommendation: Nokia Smart Phones and Sauder Bookcases should be prioritized in marketing campaigns as they deliver the highest profit margins.

Section 8 — Top Customers by Sales

Insights:

- Tom Ashbrook is the highest value customer with \$40,489 in total sales
- Tamara Chand and Greg Tran follow with \$37,453 and \$35,552 in sales respectively
- The top 3 customers alone contribute over \$113,000 in total sales
- Recommendation: Offer exclusive loyalty benefits and personalized deals to top customers like Tom Ashbrook and Tamara Chand to ensure retention and continued revenue.

Section 9 — Region-wise Total Sales

Insights:

- Central is the highest performing region with \$2,821,740 in total sales
- South ranks second with \$1,600,600 in sales
- North contributes \$1,248,121 in sales
- Recommendation: Investigate and replicate Central region's successful sales strategies in underperforming regions to drive overall revenue growth.
